EXPERIENCE

AI/ML Engineer

Jan 2024 – Present

Moon Technolabs. (Ahmedabad)

AI Agent for Automated User Queries

- Designed an **AI agent** that allows users to get direct answers without manually navigating the application.
- Built a system that **understands user intent**, **collects input**, calls relevant APIs, and delivers responses from the **database**.

Realtime AI Interview Assistant

- Engineered a **WebSocket-based Python backend** that streams live audio from the browser, converts it to WAV, and generates transcripts using **Whisper** with sub-second latency.
- Applied **OpenAI LLM** to analyze candidate answers and dynamically generate contextual follow-up questions, replicating a human interviewer's adaptability.
- Integrated **ElevenLabs TTS** to convert AI-generated questions into lifelike audio streamed back in real time to the candidate.

n8n Automation for order Processing

- Built an **n8n automation workflow** triggered by inbound Gmail messages to parse natural-language order requests, validate them, and persist to the database automatically.
- Delivered **real-time order visibility** on the client dashboard and implemented automated email responses for invalid, unrecognized, or unauthorized orders. cutting manual processing time significantly.

Calling Chatbot

- Built a Retrieval-Augmented Generation (RAG) chatbot with continuous knowledge-base updates, enabling accurate responses on live data.
- Transcribed audio to text using **OpenAI Whisper**; applied **model quantization on LLaMA-3** to reduce memory footprint and deployed via **Flask API on Runpod**.

Machine Learning Engineer

Feb 2021 – Dec 2023

Infinnium Infotech LLP. (Ahmedabad)

Analytics Project

- Extended the company's analytics platform by integrating **Named Entity Recognition (NER), Key Phrase Extraction, and Text Classification modules**, broadening its NLP capabilities.
- Implemented workflow optimizations to core processing workflows, **measurably reducing execution time** and improving platform throughput for high-volume data pipelines.
- Delivered a seamless and **efficient client experience, improving usability** and ensuring smooth adoption of the enhanced analytics features.

TECHNICAL SKILLS

- Core AI/ML:** Machine Learning, Deep Learning, Neural Networks, NLP, Computer Vision, python
- LLMs & Models:** GPT-4/4o, LLaMA 3, Mistral, Whisper, BERT, DALL-E, Claude, Gemini, Azure OpenAI
- Frameworks & Libraries:** PyTorch, TensorFlow, LangChain, CrewAI for AgenticAI, OpenCV, Transformers
- Vector Databases:** Chroma, Pinecone, Weaviate, FAISS, pgvector
- APIs & Backend:** Python language, FastAPI, Flask, Django (basics), RESTful API design, Uvicorn, WebSockets, SQL
- Cloud & Deployment:** AWS (SageMaker, Bedrock), RunPod, Ubuntu Server
- Dev Tools:** PyCharm, Jupyter Notebook, Google Colab, Vibe coding tools, n8n

EDUCATION

Marwadi University

Bachelor of Computer Engineering | CGPA: 8.63

Rajkot, GUJARAT

Aug. 2017 – June 2021
